

USING LIGHT TO BOOST Productivity

Intelligent Illumination™

We just made the world's most advanced packaging solutions even better (and brighter). Intelligent Illumination™ uses visual cues and precise alerts to put problem-solving in a new light and boost productivity.

The entire machine is wired to quickly identify issues without any wasted downtime troubleshooting with the HMI.

Patent-pending technology designed with the operator in mind.

Intelligent Illumination™ is a smarter way to maintain your machines.

- ▶ LED technology proactively cues operators where attention is needed
- ▶ Task lighting illuminates the machine, allowing operators clear visibility to perform maintenance
- ▶ Allows operators to perform basic upkeep without consulting the HMI

- ▶ Less downtime
- ▶ Less guesswork
- ▶ Quick, efficient intervention
- ▶ Completely customizable colors
