

OPTIMAL PATTERNS DIRECTLY

From the HMI

OptiStak

Our OptiStak technology is a seamless and simple palletizing solution that meets the production requirements of virtually any industry or product. With OptiStak, your operators build the optimal patterns in less time – directly from the HMI.

While others have relied on external computer solutions, Schneider decided to close the gap between efficiency and ease of use.

OptiStak lets you build the best pattern for your pallets directly from the HMI.

- ▶ Create optimal recipes with one click and without a laptop
- ▶ Customize pack patterns easily using the 3-D interface
- ▶ Keep your palletizer in production during changeovers

- ▶ FANUC-based software
- ▶ Imports offline configurations
- ▶ Automatically recognizes SKU changes
